PROFESSIONAL SUMMARY

Full-Stack Developer & Data Analyst building end-to-end, production-ready systems with React, Next.js, TypeScript, and Python. Experienced in designing API-first backends and scalable architectures using Supabase, MySQL, Redis, Docker, and GCP.

Strong foundation in data analytics with hands-on experience in Pandas, NumPy, and data visualization—applied to real-world projects like FIFA dataset analysis and distributed job pipeline monitoring. Skilled in extracting insights from structured data, building analytical workflows, and visualizing trends to drive decisions.

Proficient in asynchronous systems and data pipelines (Bull, Redis), with a focus on performance, reliability, and observability. Hands-on with GenAI/LLM workflows (LangChain, LangGraph, Hugging Face).

EDUCATION

Bachelor of Technology (Artificial intelligence)	2024 - 2028
Newton School Of Technology, Rishihood University	Grade: 7.47/10.0
Intermediate (Class XII)	2022 - 2024
Hansraj Model School	Grade: 68.0%
Matriculation (Class X)	2021 - 2022
Jai Academy	Grade: 95.0%

EXPERIENCE

Outreach	April 2025 - Present
GoforGold	<i>Remote</i>
Outreach team of GoforGold IOI camp , doing both online and offline .	

INTERNSHIPS

Core-Developer	September 2025 - Present
RelicWave	<i>Rishihood University</i>
I am currently working as a Software Engineering Intern at RelicWave Technologies , where I contribute to building and scaling full-stack SaaS platforms . My role involves developing modern web applications , automating internal workflows , and working extensively with CMS systems to manage and deploy content-driven products . I collaborate closely with product and engineering teams to design, implement, and optimize features across the frontend and backend . During the internship, I have helped streamline operations , improve system reliability , and accelerate feature delivery through automation and efficient development practices . This experience has given me hands-on exposure to real-world software engineering , SaaS architecture , and agile development workflows .	

PROJECTS

fifa (Github)	March 2026
- Developed a data analysis project on historical FIFA World Cup datasets to uncover key trends and performance insights. - Performed data cleaning, preprocessing, and exploratory data analysis using Python libraries such as Pandas and Matplotlib. - Analyzed team performance metrics including match outcomes, goal statistics, and player participation to identify factors influencing tournament success. - Built visualizations and dashboards to highlight insights such as top-performing teams, scoring patterns, and home vs away win distributions. - Derived actionable insights (e.g., dominance of specific teams like Brazil, goal distribution trends, and match win probabilities) from large datasets.	
Carbon GeoGesser (Github)	November 2025
Built and analyzed a distributed job processing system using Bull, leveraging Redis-backed queues for efficient background task execution.	

- Designed pipelines to handle high-volume asynchronous data workflows, including job scheduling, retries, prioritization, and failure handling.
- Monitored and analyzed job lifecycle metrics (processing time, failure rates, throughput) to optimize system performance and reliability.
- Implemented queue-based architecture to decouple services, improving scalability and enabling efficient handling of data-intensive tasks.
- Explored real-time processing patterns and event-driven analytics for tracking job execution and system behavior.

CERTIFICATIONS

Hult Prize Nationals Hult Prize ([Link](#))

March 2025

Team Aetheris developed an innovative carbon credit trading solution and competed at the Hult Prize Nationals, IIT Bombay. The experience provided valuable exposure and connections, demonstrating strong potential in just two months.

SKILLS

Computer Languages: Python, Swift, TypeScript, JavaScript

Software Packages: Pandas, Tailwind, React, Excel, MySQL

Additional Courses: Data Structure

Soft Skills: Presentation Skills

Others: Docker, LLM, Analytics, LangChain, GenAI, LangGraph, Google Cloud Platform, Hugging Face, Supabase

EXTRA-CURRICULAR ACTIVITIES

- Part-time editor and founder of two startups focused on real-world problem-solving.
- Skilled in cinematography, creative editing, marketing, sales, and pitching.
- Integrates psychology insights into strategies, driven by a passion for storytelling and human behavior.
- Aims to master multiple fields, leveraging diverse expertise for impactful solutions.
